For parents, teachers, and other adults charged with the care of children, this resource will provide empowerment to protect children from abuse. Written by a pediatrician in straightforward language, *Helping Children Affected by Abuse: A Parent's and Teacher's Handbook for Increasing Awareness* is an excellent and affordable resource for adults of any level of awareness on the topic. Physical, sexual, and emotional abuse are discussed in detail in a practical and accurate style, providing an exceptional resource for adults who want to know more about the ever-increasing problem of abuse. Information is presented in an easily followed format to help adults recognize signs that may suggest children are at risk for abuse or are already being abused. Readers will learn how to respond in a positive and constructive manner that gets children the help they need and keeps them safe in the process.

The intent of *Helping Children Affected by Abuse* is not to make the reader an expert, but rather to provide a thorough overview to increase their awareness of this serious issue. For readers who desire more information on specific topics, a list of additional resources is provided as an appendix to the book.

Stressing the importance of awareness, this book provides information on the following topics:

- Ways to discipline children in a constructive, nonabusive manner
- Tips for protecting children from the dangers of dating violence
- Guidelines to avoid asking leading questions that may make children give untrue answers
- The dangers of the Internet and ways to discuss them with children and monitor their Internet use
- Qualities to look for when choosing a childcare provider
- Benefits of art therapy and how it can help children express their emotions

Awareness is the first step to protecting our children from abuse. This book provides the necessary information to parents so they can take that first critical step.
